Election/R strictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7, 13-19, 25-34 drawn to methods of identifying a compound for a therapeutic use, classified in class 424, subclass 9,2.
- II. Claims 8-12, 20-24 drawn to methods of treating a diabetic associated condition, classified in class 514, subclass 415+.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation and provide different effects.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter and further because of their different classification, restriction for examination purposes as indicated is proper.

Claims 1-34 are generic to a plurality of disclosed patentably distinct species comprising diabetic conditions such as skin wound, neuropathy or neurological disorders associated with diabetes. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

A telephone call was made to Kevin Noonan on September 30, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shahnam Sharareh whose telephone number is 703-306-5400. The examiner can normally be reached on 8:30 am - 6:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Sreenivasan Padmanabhan, PhD can be reached on 703-308-1877. The
